ordy

Ask anyone outside the network.
Get the answer back as validated FHIR.

TODAY, OUTSIDE THE NETWORK

Fax and scans
Labs and rehab clinics have no secure way in.

Typed in again
Someone retypes every value by hand.

Wrong person?
A typo or a forwarded link reaches a stranger.

Prototype with synthetic data. Not for clinical use.

THE SOLUTION

Four steps, one browser, zero installs

1 DR. HOFER

Request

In her ordy workspace, next to her Matrix messages. ordy checks the address against the eHVD before sending.

2 EMAIL · SMS

Link

Secure request from Klinikum Beispielstadt
Open request

No patient, birth date or document type.

3 RECIPIENT

Answer

Log in with ID Austria. Only after every check passes does the page show the patient. Upload the document.

4 ORDY

File & notify

Parsed, checked, filed as FHIR R4 with Provenance on the clinic's server. A notice lands in Dr. Hofer's Matrix room.

0 installs **0 accounts** **a browser + ID Austria** **runs at the clinic, next to Matrix and FHIR**

RIGHT PERSON, RIGHT PATIENT

Checked three times, before any data moves

1 BEFORE SENDING

- Email domain must match the organisation in the **eHVD**
- A mismatch holds the request until Dr. Hofer confirms

TEST
Typo address `labor-kanaI.example`
✓ **Held, then refused at login**

2 AT LOGIN

- Name must match **ID Austria**
- eID level must be **full**
- Person number (bPK) bound

TEST
Forwarded link, opened by a colleague
✓ **Refused, nothing shown**

3 ON UPLOAD

- Patient in the document must match name **and** birth date
- Releasing physician confirmed in the **eHVD**

TEST
Another patient's lab result
✓ **Not filed, Dr. Hofer told**

ordy bot · Dr. Hofer · Outside documents

Request 1 was opened by someone who is not Eva Brandl (ID Austria name: Thomas Wagner). Nothing was shown or filed. Check the address.

FROM DOCUMENT TO DATA

One answer, one validated FHIR transaction

Provenance
who sent it, when, and how ID Austria checked them

Practitioner
sender and releasing physician

Organization
the lab, and ID Austria as signer

target →

DiagnosticReport
lab result · or DocumentReference for the rehab report

result ↓

INR	1.0	6301-6
aPTT	31 s	14979-9
Platelets	245	777-3
Fibrinogen	3.1 g/L	3255-7

subject →

Patient
Maria Beispiel, already on the clinic's server

Task
one per request, completed on filing

✓ Filed all-or-nothing as one **transaction Bundle** on HAPI FHIR R4

✓ Deterministic parser and checks. **No AI decides** in the main flow
